SUSTAINABLE STYLES USE MINDFUL MATERIALS

Sustainability has been part of the REEF DNA since the beginning. REEF founders, Santiago and Fernando Aguerre are surfers and beach lovers, and they did their best to create products with the least impact as possible. Today, over 37 years later, we continue these ideologies with even more emphasis because they are just as relevant now as they were then.

In 2007, REEF's mission was to incorporate renewable, recycled and/or organic materials whenever possible. This was also the time that REEF planted our flag to become 100% PVC Free, something that we can still claim to this day.

REEF SUSTAINABILITY

RECYCLED

100% recycled polyester derived from post-consumer plastic bottles and certified by the global recycling standard.

ECO FOAMS

A percentage of recycled content is in our EVA and rubber compounds. In addition we added a bio-based EVA derived from renewable sugar cane sourced in Brazil to our midsoles.

RESPONSIBLY SOURCED LEATHERS

100% of our leathers and suedes are from tanneries with gold or silver ratings with a majority being ISA lite (low impact to the environment) leathers.

NATURAL MATERIALS

100% cotton, 100% natural jute, genuine cork materials, new 100% wood logo and a unique material mix of PU and natural paper.
